Your End-to-End Solution

**Belden Copper Systems**

# BELDEN

Belden has end-to-end copper cabling systems to address your current networking challenges while providing bandwidth and scalability for the needs of the future.

Faster.  
Easier.  
Better.

## Belden Copper Systems Provide Reliable, End-to-End Networking Performance

Cabling is the core foundation of every network — its ability to provide high-performance, reliable transmission is essential for carrying out day-to-day business operations. From critical data center links that connect network switches and servers, to horizontal and backbone links that deliver voice, data and video for networking, communications, audio visual, security and building management applications, Belden has end-to-end copper cabling systems to address your current networking challenges while providing bandwidth and scalability for the needs of the future.

LEED documents are available for several products. See specific product pages for LEED document retrieval instructions.

Cable products compliant with Living Building Challenge requirements are on page 71.

## Representing Networking Leadership at Every Turn

Five different levels of Belden Copper Systems are offered to meet customers' specific needs.

Belden Copper Systems represent networking leadership at every turn, providing top-performing structured cabling systems that reduce downtime, ease deployment and facilitate migration to advanced networking technologies and converged building systems. Designed with innovative technologies that provide beyond-standards performance, Belden Copper Systems are available in five different levels to meet your specific needs — no matter what your application, your environment or your plans.

### 10GX System

The 10GX System is an end-to-end copper system designed with dynamic enabling technologies to support the most demanding current and future high-end applications with performance beyond the TIA/EIA Category 6A standard. With a guaranteed 625 MHz of usable bandwidth for 10GBASE-T applications and the highest supported frequency for broadband video at 860 MHz, the 10GX System is an ideal long-term investment that will outlast several equipment and application upgrades. Combined with a host of patch panels, assemblies, connectors and accessories, as well as a pre-terminated system, the 10GX System is the ideal solution for any current and future data center or horizontal cabling system.

### 4800 System

As the highest-performing Category 6 system available, the 4800 System provides guaranteed bandwidth to 300 MHz with exceptional signal power and signal-to-noise performance that tops TIA/EIA Category 6 requirements. From transmitting large volumes of data throughout the LAN and data center, to advanced applications like Voice over IP (VoIP), video over IP, Power over Ethernet (PoE)+ and IP-based security and building management systems, the 4800 System supports a variety of environments and applications. With a wide range of components and accessories, the end-to-end 4800 System offers the longest operational lifespan of any Category 6 system.

### 3600 System

The 3600 System offers the best price-performance ratio of any end-to-end Category 6 system on the market. With guaranteed performance to 280 MHz, the 3600 System offers headroom beyond the TIA/EIA Category 6 standard to support any current IP-based application, including VoIP, PoE, wireless access points and building automation systems. Enhanced crosstalk and impedance performance, combined with a compact size and available pre-terminated system for rapid data center deployment, make the 3600 System the most cost-effective solution for high-traffic and high bit-rate applications throughout the LAN environment.

### 2400 System

The 2400 System offers moderate communications performance for general business applications and transactions, including advanced file sharing and downloads. It offers a guaranteed bandwidth of 250 MHz to support 10/100/1000BASE-T applications with enhanced, error-free Category 6 performance. With cables, modular jacks, cords, patch panels and a cross-connect system, the 2400 System is an ideal market-entry solution for businesses ready for reliable end-to-end Category 6 performance.

### 1200 System

For networks requiring only Category 5e performance, the 1200 System is the best-performing Category 5e system available. The 1200 System exceeds all requirements for Category 5e performance with guaranteed bandwidth to 160 MHz—more bandwidth than typical Category 5e systems. Ideal for budget-conscious and short-term investments, the 1200 System is robust enough to support a variety of basic business applications in standard environments, including basic PoE.

Faster.  
Easier.  
Better.

### Belden Copper Systems – Performance and Component Selection Matrix

System	10GX System	4800 System	3600 System	2400 System	1200 System
Performance Standard	Category 6A	Category 6	Category 6	Category 6	Category 5e
Available Bandwidth	625 MHz	300 MHz	280 MHz	250 MHz	160 MHz
Cable Selection	10GXS Series 10GX Series	DataTwist 4800 Series	DataTwist 3600 Series	DataTwist 2400 Series MediaTwist Series	DataTwist 1200 Series
Connectivity Selection	10GX IDC Cross-Connect	GigaBIX Cross-Connect			BIX and 110 Cross-Connect
	10GX Modular Patch Panels 10GX Modular Jacks 10GX Modular Patch Cords	CAT6+ Modular Patch Panels CAT6+ Modular Jacks CAT6+ Modular Patch Cords			CAT5E Modular Patch Panels CAT5E Modular Jacks CAT5E Modular Patch Cords
	REVConnect, KeyConnect, and Flex Modular Patch Panels MediaFlex, KeyConnect, Interface and MDVO Outlet Hardware (Configurable with appropriate modules)				

### Belden Shielded Systems – Performance and Component Selection Matrix

Shielded System	10GX Shielded System	2400 Shielded System	1200 Shielded System
<b>Performance Standard</b>	Category 6A	Category 6	Category 5e
<b>Available Bandwidth</b>	625 MHz	250 MHz	160 MHz
<b>Cable Selection</b>	10GX Shielded Series	2400 Shielded Series	1200 Shielded Series
<b>Connectivity Selection</b>	10GX Shielded Modular Jacks 10GX Shielded Modular Patch Cords	CAT6+ Shielded Modular Jacks CAT6+ Shielded Modular Patch Cords	CAT5E Shielded Modular Jacks CAT5E Shielded Modular Patch Cords
	REVConnect, KeyConnect, and Flex Modular Patch Panels MediaFlex Faceplates, KeyConnect Faceplates and Adapters (Configurable with appropriate modules)		

REVConnect Modules are compatible with KeyConnect footprints

### Best-in-Class Support and Warranties\*

All Belden Systems are backed by expert service and technical support, and a commitment to delivering high-performance, reliable transmission solutions. Belden backs certified systems with two unique, best-in-class warranties for complete peace of mind: a 25-Year Product Warranty and a Lifetime Application Assurance Program. From the date of installation, the 25-Year Product Warranty warrants against defects in materials and workmanship, and guarantees that components meet or exceed all applicable standards. Under the Lifetime Application Assurance Program, Belden warrants that each certified System will deliver its specified throughput rate and minimum bandwidth capabilities, and be capable of operating the applications that the system was originally designed to support, as well as any new applications, for the lifetime of the installed system.

\*When installed by a Belden Certified Partner

# Game-Changing REVConnect System

Try  
REVConnect  
Today with a  
Starter Pack  
RVASP01

## Reliable

A highly reliable termination for a secure, gas-tight connection that is proven to reduce rework at all category levels.

## Easy

The universal wiring manager supports all Category 6A, 6 and 5e cables with a single tool that covers all steps of the termination process, including cable preparation.

## Versatile

The same universal core can terminate a jack or a plug. This means that field-terminable plugs, which support Category 6A and 100W PoE performance, can be terminated as quickly and easily as a jack.

## REVConnect Will Change the Way You Think About Connectivity

Belden has designed a better RJ45 connectivity system: one that addresses the needs of emerging applications, takes advantage of connectivity trends and answers the pain-points expressed by installers.

### Safe Connectivity for Spaces

Plenum rated; meets UL 2043 requirements.

### Direct Connect Cost Savings

Avoid the cost of patch cords, jacks, and biscuit boxes.

### Supports 4K HDBaseT

Combine with Belden's 4K UHD Media Cables for the most reliable HDBaseT cabling solution available.

### Power and Performance Your Applications Demand

100W ready for security cameras, wireless access points, and other devices.

Visit [belden.com/REVConnect](http://belden.com/REVConnect) to learn more about this connectivity system.

Faster.  
Easier.  
Better.

## Top-Quality Flagship Innovations Provide the Ultimate Value

### Belden Bonded-Pair Cables

Available for each Copper System, Belden Bonded-Pair Cables feature a patented design that bonds the individual conductors along their longitudinal axis for extremely uniform spacing that maintains pair geometry and consistent electrical performance. With higher pulling tensions and tighter bend radii, Belden Bonded-Pair Cables are better suited to withstand the rigors of real-world installations and accommodate high-density data center applications that experience a great deal of cable bending in and around patch panels. Because Belden Bonded-Pair Cables avoid gaps along the twisted pairs, they provide improved return loss and balance performance that makes them less susceptible to electromagnetic and radio frequency interference (EMI/RFI) in noisy environments. This innovative Belden technology is ideal for high-frequency 10G and broadband video applications, as well as any mission-critical situations where dropped signals are not an option.

### Pre-Terminated Cabling Systems

Ideal for data centers where time, reliability and performance are critical, Belden Pre-Terminated Cabling Systems are easy to configure, easy to order and easy to install. With an intuitive plug-and-play action, built-in reliability that virtually eliminates testing and simple, reusable components, Belden's Pre-Terminated Cabling Systems provide superior performance, save significant time and money, and offer energy and waste savings. At the heart of these systems are two core components — pre-terminated cable assemblies and RJ45 modular couplers. The pre-terminated cable assemblies are a six cable bundle terminated with smaller-footprint RJ45 plugs that provide easy pulling, routing, cable management and connection. Compatible with Belden's full line of KeyConnect modular patch panels, the RJ45 modular couplers are RJ45-to-RJ45 inline couplers designed to meet the performance requirements of a single plug-jack connection while offering the inherent simplicity of a true plug-and-play solution. Systems are available in unshielded and shielded 10GX Pre-Terminated Cabling for 10G applications and 3600 Pre-Terminated Cabling for the ultimate in Category 6 performance.

### REVConnect Modularity

Our REVConnect modules feature the same footprint as our existing KeyConnect line, allowing them to be used with our existing line of patch panels, faceplates, adapters and boxes. REVConnect jacks are available in 10GX, CAT6+, and CAT5E, shielded and unshielded, to suit any network performance level.

Each modular component of the REVConnect and KeyConnect series fits together seamlessly to accommodate any application—from the data center to the workstation. Designed with superior signal transmission performance, REVConnect and KeyConnect Modules can be easily inserted and removed from any keystone-style opening, providing design flexibility, reduced installation time and the ability to reconfigure as needs change. For data centers and telecommunications rooms, modular KeyConnect Patch Panels can be preloaded or configured using any REVConnect or KeyConnect Modules for any level of density, including a 48-port/1U configuration. The modules can also be used with front-loading Belden MediaFlex Outlets for mixing and matching with Multimedia Modules. REVConnect and KeyConnect components come in a variety of colors and styles, including more than 19 colors of jacks, stainless steel faceplates, single-gang and double-gang configurations, and boxes equipped with protective shutters.

### Best Design and Installation Partners

Well positioned as a leading single-source provider, Belden's PartnerAlliance program is a top-quality global network consisting of fully trained Certified System Vendors (CSVs), Networking and AV installation partners. Belden recruits and qualifies only the best partners to design, deliver and install certified systems backed by our industry-leading warranties. Belden invests heavily in evaluating, training and qualifying our partners so they have the knowledge and expertise necessary to ensure that the design and installation of each Belden system is optimized for the required standards, technology environment and lifespan of the network.

Belden Copper System components include several innovative technologies designed to ensure cost-effective, easy deployment and maximum performance and reliability, while meeting current and future needs for capacity and scalability.

Direct-Attach Cables	23

The copper cabling system that does it all, the 10GX Category 6A System supports the most demanding current and future high-end applications with performance beyond the Category 6A standard. The system is comprised of 10GX System Cables (either 10GXS or 10GX), preloaded or modular 10GX Patch Panels, 10GX Modular Jacks and 10GX Modular Patch Cords. Together, these components form an end-to-end system that guarantees 625 MHz of usable bandwidth to support full implementation of 10GBASE-T applications and broadband video at 860 MHz. 10GX Systems are also designed with PoE in mind to supply up to 100W of power to various devices, such as sensors, POS systems and security cameras. A truly long-term investment, the 10GX System is designed to outlast several equipment and application upgrades.

The 10GX System is available in a 10GX Pre-Terminated System that features proven modular components with superior performance and intuitive plug-and-play installation for saving significant time and money. For cross-connect and interconnect systems, the 10GX IDC System is a high-performance, space-saving modular connection system. For harsher EMI environments, the 10GX Shielded System and the 10GX Shielded Pre-Terminated System provide a higher degree of noise immunity in a true end-to-end shielded system that maintains shielding integrity throughout the entire system.

10GX System is based on Belden's innovative enabling technologies.

**REVConnect technology**, revolutionary connectivity that features insulation piercing contacts for a stable and reliable termination, superior electrical performance and high PoE support.

**EquiSpline** maintains structural integrity, which improves cable roundness and optimizes electrical performance.

**EquiBlock Barrier Technology** improves heat transfer and blocks noise coupling.

**Bonded-Pair technology** offers uniform spacing of conductors for exceptional structural stability and superior electrical performance.

**MatriX IDC technology** positions each IDC at a right angle to its adjacent IDC to cancel out alien crosstalk and provide stable, high performance in high-density environments.

**FleXPoint PCB technology** positions the compensation circuitry in 10GX Modular Jacks directly at the plug's point of contact for better crosstalk performance.

**Dual-Flex PCB technology** in the RJ45 Coupler of 10GX Pre-Terminated Cabling Systems ensures an uninterrupted electrical path for enhanced reliability.

EquiSpline™ Design and EquiBlock™ Barrier Effects

Better.

## Category 6A, 10GXS Small-Diameter Cables

Nonbonded-Pair and Bonded-Pair

The demand for 10G performance is growing. Emerging applications are poised to take advantage of higher 10G speeds and call for higher power delivered over the cable. With an effective diameter of just 0.265" for CMP and 0.273" for CMR, 10GXS Cables have proven performance that exceeds Category 6A requirements for 100 m channels. These cables are ideal for LANs and enterprise data centers that require high-density and high-bandwidth connections for current and emerging network applications.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

### Applications:

- 10GBASE-T Ethernet
- 1000BASE-T, 2.5G and 5G Ethernet
- PoE PSE Type 1 (15W), PSE Type 2 (30W)  
PSE Type 3 (60W), PSE Type 4 (100W)
- IEEE 802.11ac Wave 1 and Wave 2 High-Throughput Wi-Fi
- Eliminates length de-rating up to 60°C for 10GBASE-T
- HDBaseT, Broadband (CATV) and High-Speed Internet (DOCSIS)

Shaded part numbers indicate LP-Certified by UL

10GX System Cable

Innovative RoundFlex Design

## Category 6A, 10GX Cables

### Nonbonded-Pair and Bonded-Pair

10GX Cable delivers performance that goes beyond the ANSI/TIA/EIA 568-C.2 Category 6A standard. When used as the horizontal cable within the Belden 10GX System, it provides 625 MHz of proven channel bandwidth and a data rate of 10G per second. This performance is made possible through the innovative RoundFlex™ design that reduces alien crosstalk by randomizing the distance between cables.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

### Applications:

- 10GBASE-T Full Power Implementation (IEEE 802.3an)
- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- PoE PSE Type 1 (15W), PSE Type 2 (30W), PSE Type 3 (60W), PSE Type 4 (100W)
- Broadband Video (CATV) and High Speed Internet (DOCSIS) over UTP up to 860 MHz

Shaded part numbers indicate LP-Certified by UL

## Category 6A, 10GX Patch Panels

### Preloaded and Modular

10GX Patch Panels are available in REVConnect and KeyConnect styles, as well as Belden's unique AngleFlex design. Configurations include 24-port 1U, 48-port 2U and 48-port 1U in flat and angled designs. Preloaded panels are available with RJ45 jacks or couplers.

#### Benefits

- Performance up to 625 MHz
- Flat, Angled and AngleFlex options available
- Quick and easy termination with REVConnect termination tool (REVConnect patch panels)
- Front access options (REVConnect patch panels) for additional versatility

#### Features

- REVConnect Patch Panels feature Belden's revolutionary REVConnect core technology
- REVConnect Patch Panels are compatible with color icons and dust covers
- KeyConnect Patch Panels feature Belden's 10GX Connectors with FlexPoint PCB technology and Matrix IDC technology
- Single-port modularity on REVConnect and KeyConnect standard densities
- Labeling and cable management accessories included with all patch panels

## Category 6A, 10GX Connectors, Tools and Accessories

REVConnect, KeyConnect and MDVO

REVConnect Jacks Available in 19 Colors

AX102281, 10GX KeyConnect Modular Jack

RVAFPUBK-S1, REVConnect 10GX Field-Mount UTP Plug

10GX Connectors are available in two termination styles: Belden's new REVConnect System and standard punchdown in KeyConnect or MDVO styles. REVConnect and KeyConnect have a keystone footprint and are designed to be used with any KeyConnect Patch Panels and with KeyConnect or MediaFlex Workstation Outlets.

### Benefits

- REVConnect: Safe connectivity for air-handling spaces
- REVConnect: Offers great versatility and labor savings
- Easy termination and network administration

### Features

- REVConnect: Plenum rated - meets UL 2043 requirements
- REVConnect: Requires no pair separation; the best connector for Bonded-Pair and Nonbonded-Pair cable
- REVConnect: Terminates four pairs simultaneously with REVConnect Universal Termination Tool
- KeyConnect/MDVO offer 10GX enabling technologies: Matrix IDC, X-Bar and FlexPoint PCB
- Meets and exceeds Category 6A component performance with guaranteed usable bandwidth up to 625 MHz

## Category 6A, 10GX Modular Patch Cords

### Bonded-Pair

10GX Modular Patch Cords are designed based on a patented plug management bar that allows for excellent control of internal plug NEXT. Bonded-Pair design offers very good alien crosstalk performance while maintaining important mechanical characteristics, such as flexibility. With a very small footprint, they are fully compatible with the highest-density hubs that utilize RJ45 jack connections.

#### Benefits

- Meets and exceeds Category 6A component performance with guaranteed usable bandwidth up to 625 MHz
- Maximum return loss (RL) performance under all patching conditions
- Superior ruggedness and durability

## Category 6A, Small-Diameter Patch Cords

Nonbonded-Pair (28 AWG)

Small-Diameter Patch Cords

Small-Diameter Patch Cords offer a great solution for large data center cross-connects and server enclosures, as well as for enterprise networks installed in crowded telecom rooms. The 28 AWG stranded conductors provide standards-compliant performance when up to 20.7 ft (6.3 m) of patch cord is used in a standard 295 ft (90 m) channel.

### Benefits

- Reduces congestion and allows tight bend radius and improve airflow
- Easier access for maintenance
- Improves overall network administration

## Category 6A, 10GX Traceable Patch Cords

### Bonded-Pair

10GX Traceable Patch Cords feature a highly efficient, bright LED with a battery life expectancy of seven years, or 1,000 activations (battery is also replaceable). When activated, the LED blinks for 20 seconds and can be stopped at any time with a second press of the button. The LED and its tracing wires are integrated right into the patch cord, eliminating the need for a separate power source.

#### Features

- Bonded-Pair technology for extra robustness, performance and reliability
- Bar code tagging on each end of the cord is compatible with DCIM systems
- Low-profile plug boot supports ultra-high-density 48-port 1U patch panels
- 100% factory tested and certified

10GX Modular Pigtails (connector side)

## Category 6A, 10GX Modular Pigtails

Nonbonded-Pair and Bonded-Pair

10GX Modular Pigtails are available in both Bonded-Pair and Nonbonded-Pair cable styles for field installation preferences. They are available in dark and TIA/EIA-606 standard colors, and feature a snagless overmolded boot for high-performing strain relief. All performance characteristics have been set to guarantee transmission performance up to 625 MHz.

### Benefits

- Maximum RL performance under all patching conditions
- Superior ruggedness and durability
- Meets and exceeds Category 6A component performance with guaranteed usable bandwidth up to 625 MHz

## Category 6A, 10GX Pre-Terminated Cabling System

### Patch Panels, Couplers and Cable Assemblies

The 10GX Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability.

Proven modular components are the cornerstone of the systems, including 10GX Pre-Terminated Cable Assemblies and 10GX RJ45 Modular Couplers. These components rely on unique enabling technologies: Bonded-Pair ensure that the cable assemblies boast exceptional structural stability and unfailing electrical performance while the patented Dual-Flex

design ensures controlled plug/jack mated connection on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the 10GX Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90%. In addition, this system supports plug-and-play installation and component reusability, resulting in lower installed costs and less waste.

10GX IDC Frame

## Category 6A, 10GX IDC System

Connecting Components, Accessories, X-Connect Cables and Frames

The Belden 10GX IDC System is a high-performance, space-efficient, modular connection system. The system meets the TIA/EIA 568-C.2 standard, and is uniquely engineered to deliver unmatched 10G performance — handling 10GBASE-T data networking and multimedia applications with headroom to spare.

The 10GX IDC System is extremely flexible; it accommodates the configuration of large cross-connect systems and interconnect systems within racks. Because of its modularity, the system also accommodates future moves, adds and changes (MACs) with ease.

## Category 6A, 10GX Shielded Cables

Nonbonded-Pair and Bonded-Pair

The 10GX Shielded System provides 625 MHz of proven channel bandwidth and a data rate of 10G per second. With a thick, 100% coverage foil shield, your 10G of data is protected from harsh EMI environments.

Adding a shield to a high-performance Category 6A cable is not as easy as it seems. Any metallic shield changes the electrical performance of the cable; if the shield is not smooth, performance becomes unpredictable. Our design utilizes an inner and outer jacket to sandwich the foil into having a smooth surface. This eliminates adverse PSNEXT and RL effects seen with most other 10G cable products.

### Applications:

- 10GBASE-T, and any other Ethernet application in high-noise environments (EMI)
- 10GBASE-T Full Power Implementation (IEEE 802.3an)
- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- PoE PSE Type 1 (15W), PSE Type 2 (30W), PSE Type 3 (60W), PSE Type 4 (100W)
- Broadband Video (CATV) and High Speed Internet (DOCSIS) over UTP up to 860 MHz

Shaded part numbers indicate LP-Certified by UL

## Category 6A, 10GX Shielded System

### Patch Panels, Jacks, Plugs and Patch Cords

10GX Shielded Modular Patch Panel (Empty)

10GX Shielded REVConnect Modular Jack and Plug

10GX Shielded Patch Panels are robust, all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for data center and teleco room installations. They come with a ground wire to guarantee shielding integrity (per ANSI/TIA-607-C) and cable management brackets for neat cable dressing. They can be configured using 10GX Shielded Modular Jacks available in REVConnect and KeyConnect styles.

The 10GX REVConnect module is a rugged, easy-to-install connector. Its termination features a universal core that accepts a jack or plug to support connections in a keystone outlet or direct connections into devices.

10GX Modular Patch Cords are designed around a patented plug management bar design that allows for very good control of internal plug NEXT. It offers excellent alien crosstalk performance while maintaining flexibility.

## Category 6A, 10GX Shielded Pre-Terminated Cabling System Couplers, Accessories and Cable Assemblies

10GX Shielded Pre-Terminated Cable System

10GX Shielded KeyConnect RJ45 Coupler

The 10GX Shielded Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy high-performance 10G networks with optimal speed and efficiency. Proven modular components are the cornerstone of the system, including 10GX Shielded Pre-Terminated Cable Assemblies and 10GX Shielded RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-Pair technologies ensure that the cable assemblies

boast exceptional structural stability and unfailing electrical performance while the patented Dual-FleX design ensures controlled plug/jack mated connections on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the 10GX Shielded Pre-Terminated Cabling System will drastically reduce installation time and labor costs. In addition, this system supports plug-and-play installation and component reusability, resulting in lower installation costs and less waste.

## Direct-Attach Cables

### SFP+/QSFP+ Cable Assemblies

To meet the most stringent signal transmission performance requirements, QSFP+/SFP+ Direct-Attach Cables are manufactured with Belden Lightskew Series cable, which offers intra-pair delay skew as low as 15 ps/m, silver-plated conductors, aluminum/Mylar foil and tinned copper braiding, and an FT4/CL2-rated PVC jacket.

Thoroughly third-party evaluated and tested, the zinc die-cast connectors with easy pull-to-release action are compatible with virtually all QSFP+/SFP+ Direct Attach compliant devices, cages and network interface cards.

These cables provide better cable management for high-density deployments and enhanced electrical characteristics for the most reliable signal transmission.

#### Features and Benefits

- Easy pull-to-release latching mechanism
- Compliant with the latest SFF-8431 specifications
- Connector cage designed for high-speed differential signaling
- Supports 8x/4x/2x/1x Fibre Channel data rates for SANs and NAS
- Supports Ethernet 10G data rates with backward compatibility to 1G
- Available in a generic or Cisco-compatible EEPROM

CAT6+ Shielded System	38-39

Belden offers three beyond-standards Category 6 (CAT6+) copper systems to support a variety of price-performance ratios, applications, environments and operational lifespans: the 4800 System, 3600 System and 2400 System. Each Category 6 system is comprised of DataTwist Cable with various guaranteed bandwidth levels and application recommendations, preloaded and modular KeyConnect Patch Panels, CAT6+ Modular Jacks and CAT6+ Modular Patch Cords.

**4800 System** is the highest-performing Category 6 system available with guaranteed bandwidth to 300 MHz and exceptional signal power and signal-to-noise performance that exceeds TIA/EIA Category 6 requirements.

**3600 System** offers the best price-performance ratio of any end-to-end Category 6 system on the market. With guaranteed performance to 280 MHz, the 3600 System offers headroom beyond the TIA/EIA Category 6 standard.

**2400 System** offers a guaranteed bandwidth of 250 MHz to support enhanced, error-free Category 6 performance for reliable business applications and transactions.

Belden's 3600 Pre-Terminated Cabling System features proven modular components and an intuitive plug-and-play installation that delivers rapid deployment and guaranteed Category 6 performance and headroom.

Based on proven reliable BIX technology, the space-saving GigaBIX Category 6 Cross-Connect System offers easy installation and cable management for high-density applications.

With DataTwist 2400 Shielded Cables, Shielded Patch Panels and CAT6+ Shielded Modular Jacks and Cords, Belden also offers an end-to-end Category 6 shielded system that provides better noise immunity to improve data throughput in harsh EMI environments.

Faster.  
Easier.  
Better.

## Category 6, DataTwist 4800 Cables

### Nonbonded-Pair and Bonded-Pair

DataTwist 4800, part of the 4800 System, is a UTP cable engineered specifically to perform well beyond ANSI/TIA-568-C.2 Category 6 requirements. All DataTwist 4800 Cables are designed to provide low insertion loss (low signal attenuation). This characteristic enables increased signal power over a higher range of frequencies. A strong signal translates into maximum headroom and more robust transmission for today's applications, as well as a capacity for tomorrow's networks. The higher signal power of DataTwist 4800 Cables also results in a higher PSACR. With this higher ratio, 4800 Cables provide fewer transmission errors and higher data rate capability.

DataTwist 4800 with Bonded-Pair technology is fully characterized with guaranteed performance to 600 MHz. Available in plenum and non-plenum versions, DataTwist 4800 with Bonded-Pair technology provides a greater amount of

headroom, enabling the structured cabling system to deliver guaranteed performance even when unforeseen circumstances arise.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

#### Applications:

- 1000BASE-T Applications (IEEE 802.3ab)
- PoE PSE Type 1 (15W), PSE Type 2 (30W), PSE Type 3 (60W), PSE Type 4 (100W)
- Broadband video (CATV) and high speed internet (DOCSIS) over UTP
- High temperature performance up to 50°C without length de-rating for 1000BASE-T and 100BASE-TX

Shaded part numbers indicate LP-Certified by UL

DataTwist 3600 Cable

## Category 6, DataTwist 3600 Cables

### Nonbonded-Pair and Bonded-Pair

DataTwist 3600 Cables provide increased bandwidth and signal-to-noise margins with smaller-diameter and higher-performance over other Category 6 cables.

DataTwist 3600 Cables have descending-distance marking for cable length that reduces waste. Matching tip and ring are color-coded for easy installation. Available in Spool-in-Box packaging for easier installation, handling and inventory management.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

### Features

- Central spline design separates pairs and maintains stable pair position, improving crosstalk and impedance/RL performance
- Increased bandwidth and signal-to-noise margins
- Optimized balance of transmission performance for simultaneous parallel transmission protocols
- Size minimized for compact installations
- PoE PSE Type 1 (15W), PSE Type 2 (30W), PSE Type 3 (60W), PSE Type 4 (100W)
- When used with 3600 System, the channel provides at least 280 MHz of bandwidth

## Category 6, DataTwist 2400 Cables

### Nonbonded-Pair

DataTwist 2400 Cables consists of 4-pair UTP cables that exceed Category 6 requirements as per ANSI/TIA-568-C.2. When used as the horizontal cable in the 2400 System, the channel provides at least 250 MHz of bandwidth.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

DataTwist 2400 Cable

MediaTwist Cable

## Category 6, MediaTwist Cables

### Bonded-Pair

MediaTwist, part of the 2400 System, is engineered to exceed ANSI/TIA-568-C.2 Category 6 requirements. The exceptional physical uniformity of MediaTwist translates into premier electrical performance. Available in plenum and non-plenum versions, MediaTwist has taken Bonded-Pair technology a step further.

Its unique crescent-shape design ensures that pair-to-pair movement is minimized during installation. The innovative design of MediaTwist provides stable crosstalk and impedance performance before and after installation. This results in improved signal integrity and reduced signal radiation, making MediaTwist an excellent choice for your Category 6 cable.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

## Category 6, CAT6+ Patch Panels

### Preloaded and Modular

The CAT6+ Patch Panels are available in REVConnect and KeyConnect styles, as well as HD-110 and AngleFlex designs. Configurations include 24-port 1U, 48-port 2U and 48-port 1U in flat and angled designs. Preloaded panels are available with RJ45 jacks or couplers.

#### Benefits

- Performance up to 300 MHz (4800 System)
- Flat, Angled and AngleFlex options available
- Quick and easy termination with REVConnect termination tool (REVConnect patch panels)
- Front access options (REVConnect patch panels) for additional versatility

#### Features

- REVConnect Patch Panels feature Belden's revolutionary REVConnect core technology
- REVConnect Patch Panels compatible with color icons and dust covers
- KeyConnect Patch Panels feature Belden CAT6+ KeyConnect Connectors with patented leadframe technology
- Single-port modularity on REVConnect and KeyConnect standard densities
- Labeling and cable management accessories included with all patch panels

KeyConnect AngleFlex Patch Panels

## Category 6, CAT6+ Connectors, Tools and Accessories

REVConnect, KeyConnect and MDVO

REVConnect Jacks Available in 19 Colors

AX104193, KeyConnect Jack

RVUTT01, REVConnect Termination Tool; includes one Cable Prep Tool and spare blade set

CAT6+ Connectors are available in two termination styles: Belden's new REVConnect System and standard punchdown in KeyConnect or MDVO styles. REVConnect and KeyConnect have a keystone footprint and are designed to be used with any KeyConnect Patch Panels and with KeyConnect or MediaFlex Workstation Outlets.

### Benefits

- REVConnect: Safe connectivity for air-handling spaces
- REVConnect: Offers great versatility and labor savings
- Easy termination and network administration
- Performance margins for all Gigabit network applications

### Features

- REVConnect: Plenum rated - meets UL 2043 requirements
- REVConnect: Requires no pair separation; the best connector for Bonded-Pair and Nonbonded-Pair cable
- REVConnect: Terminates four pairs simultaneously with REVConnect Universal Termination Tool
- KeyConnect/MDVO: Compatible with Belden's Rapid Termination Tool
- Meets and exceeds all Category 6 component performance

## Category 6, CAT6+ Modular Patch Cords

### Bonded-Pair

CAT6+ Modular Patch Cords are made with Belden's patented Bonded-Pair cables, offering the best combination of transmission performance and physical integrity. Solid conductors improve attenuation and are needed in long patch cords to eliminate the need for cable de-rating in open-office cabling. They feature improved strain relief and a flexible boot for optimum protection in high-density installations.

#### Benefits

- Wrap-around label on each cord for easier product identification and length sorting
- Maximum RL performance under all patching conditions
- Superior ruggedness and durability

## Category 6, Small-Diameter Patch Cords

Nonbonded-Pair (28 AWG)

CAT6+ Small-Diameter Patch Cords

CAT6+ Small-Diameter Patch Cords offer a great solution for large data center cross-connects and server enclosures, as well as for enterprise networks installed in crowded telcom rooms. The 28 AWG stranded conductors provide standards-compliant performance when up to 20.7 ft (6.3 m) of patch cord is used in a standard 295 ft (90 m) channel.

### Benefits

- Reduces congestion and allows tight bend radius and improved airflow
- Easier access for maintenance
- Improves overall network administration

## Category 6, CAT6+ Traceable Patch Cords

### Bonded-Pair

CAT6+ Traceable Patch Cords feature a highly efficient, bright LED with a battery life expectancy of seven years, or 1,000 activations (battery is also replaceable). When activated, the LED blinks for 20 seconds and can be stopped at any time with a second press of the button. The LED and its tracing wires are integrated right into the patch cord, eliminating the need for a separate power source.

### Features

- Belden Bonded-Pair technology for extra robustness, performance and reliability
- Barcode tagging on each end of the cord is compatible with DCIM systems
- 100% factory tested and certified

## Category 6, CAT6+ Modular Pigtails

Nonbonded-Pair and Bonded-Pair

CAT6+ Modular Pigtails (connector end)

CAT6+ Modular Pigtails feature a snagless overmolded boot for high-performing strain relief. All pigtails feature solid conductors to improve attenuation and eliminate the need for cable de-rating in open-office cabling.

### Benefits

- Maximum RL performance under all patching conditions
- Superior ruggedness and durability

## Category 6, CAT6+ Pre-Terminated Cabling System

### Patch Panels, Couplers and Cable Assemblies

The CAT6+ Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6 performance and headroom, without the need for tradeoffs or compromise in performance and reliability.

Proven modular components are the cornerstone of the system, including 3600 Pre-Terminated Cable Assemblies and CAT6+ RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-Pair technologies ensure that cable assemblies boast exceptional structural stability and unflinching

electrical performance while the patented plug management bar design allows for excellent control of internal plug NEXT and superior plug/jack mated-pair performance.

With simple planning, easy ordering and rapid delivery, the CAT6+ Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90%. In addition, this system supports plug-and-play installation and component reusability, resulting in lower installed costs and less waste.

### Category 6, CAT6+ Pre-Terminated Trunks

C6	01	1	06	020	A06
Performance	Cable	Termination	Colors	Length	# of Cables
C6 Category 6, CAT6+	01 UTP, Bonded-pair, 24 AWG Solid, CMR	1 T568A/B-T568A/B	06 Blue	006 6 ft (1.8 m)	A06 6 Cables
	02 UTP, Bonded-pair, 23 AWG Solid, CMP		08 Gray	007 7 ft (2.1 m)	A08 8 Cables
			09 White	008 8 ft (2.4 m)	
			00 Black	009 9 ft (2.7 m)	
				010 10 ft (3 m)	
				xxx xxx ft	

#### Notes:

Length: From 6 ft to 100 ft (1 ft increment). From 105 ft to 295 ft (5 ft increment).  
If length is longer than 220 ft, 23 AWG cables are used.

#### Example:

**C601106020A06** – CAT6+ Pre-Terminated Trunk (bundle of six cables), UTP, Bonded-Pair, 24 AWG Solid, CMR, T568A/B-T568A/B, Blue, 20 ft (2.1 m)

## Category 6, CAT6+/GigaBIX IDC System

Kits, Components, Accessories and Patch Cords

GigaBIX Termination Kit, 72-port

GigaBIX Connector, 6-port

CAT6+ GigaBIX Patch Cord, BIX-BIX, 4 ft

GigaBIX Cable Management Module and Patch Cord Organizer

The Belden GigaBIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for data networks. This uniquely designed system allows for very high termination density, while maintaining ease of administration to accommodate moves, adds and changes.

Advantages of the Belden GigaBIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows up to 300 pairs to be terminated in a very small area—a real space-saving advantage in today's office environment where real estate is at a premium.

## Category 6, DataTwist 2400 Shielded Cables

### Nonbonded-Pair

DataTwist 2400 Shielded Cable consists of 4-pair F/UTP cables that exceed Category 6 ANSI/TIA/568-C.2 requirements. When used as the horizontal cable in the 2400 Shielded System, the channel provides at least 250 MHz of bandwidth. DataTwist 2400 F/UTP shielded cable has a thick,

100% coverage foil shield. This shield protects your system from harsh EMI environments, improving your data throughput.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

## Category 6, CAT6+ Shielded System

### Patch Panels, Jacks and Patch Cords

CAT6+ Shielded Modular Patch Panel (Empty)

CAT6+ Shielded REVConnect and KeyConnect Modular Jacks

CAT6+ Shielded Patch Panels provide a flexible, versatile and high-density termination solution for data center and telecom room installations. They come with a ground wire to guarantee shielding integrity (per ANSI/TIA-607-C) and cable management brackets for neat cable dressing. They can be configured using 10GX Shielded Modular Jacks available in REVConnect and KeyConnect styles.

The CAT6+ REVConnect module is a rugged, easy-to-install connector. Its termination features a universal core that accepts a jack or plug to support connections in a keystone outlet or direct connections into devices.

CAT6+ Shielded Modular Patch Cords are designed to be used within the 2400 Shielded System. They offer the best combination of transmission performance and shielding integrity.

## Category 6, CAT6+ Shielded System (continued)

### Pigtails

CAT6+ Shielded Modular Pigtails feature solid conductors to improve attenuation and to eliminate the need for cable de-rating in open-office cabling.

#### Benefits

- Maximum RL performance under all patching conditions
- Superior ruggedness and durability

CAT6+ Shielded Modular Pigtail (connector end)

DataTwist 1200 Shielded Cables	50
CAT5E Shielded System	51-52

The 1200 System is the best performing Category 5e system available, exceeding all requirements for Category 5e performance with guaranteed bandwidth to 160 MHz. The system is comprised of Nonbonded-Pair or Bonded-Pair DataTwist 1200 Cable, KeyConnect Patch Panels and CAT5E Modular Jacks and Cords. A BIX Cross-Connect System, 110 Cross-Connect System and end-to-end shielded system are also available as part of Belden's comprehensive Category 5e offering. The 1200 System features several Belden innovations that ease installation and management, ensure maximum performance and support a variety of environments.

**DataTwist 1200 Bonded-Pair Enhanced Category 5e Cable** is available in plenum and non-plenum versions. Using patented Bonded-Pair technology, DataTwist 1200 cable offers superior electrical performance that exceeds Category 5e performance.

**DataTwist 1200 Banana Peel® Enhanced Category 5e Cable** uses a unique patented design that bundles six DataTwist Bonded-Pair Category 5e Cables to a center spline, offering a smaller size for easier termination and installation.

**CAT5E HD Patch Panels** combine punch down connectors with standard modular jacks to speed installation. CAT5E HD Patch Boxes, available in BIX and 110 configurations, hold a 12-port universal connector module in a compact and robust metal enclosure.

**CAT5E KeyConnect Modular Jacks** feature patented Encapsulated Lead Frame technology that offers excellent long-term reliability as well as extremely stable transmission performance.

Faster.  
Easier.  
Better.

## Category 5e, DataTwist 1200 Cables

Nonbonded-Pair, Bonded-Pair

DataTwist 1200 Cable Series consists of 4-pair UTP cables that exceed Category 5e ANSI/TIA/EIA-568-C.2 requirements. When used as the horizontal cable in the Belden 1200 System, the channel provides 160 MHz of bandwidth.

DataTwist 1200 Banana Peel® Enhanced Category 5e Cable is a patented design that effectively bundles six DataTwist 1200 Bonded-Pair Category 5e Cables to a center

spline, eliminating the need for an overall jacket. The elimination of the outer jacket means simpler termination by peeling the cables directly off the spline, as well as a decrease in size and relative bend radius.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

KeyConnect Patch Panels (Empty)

KeyConnect AngleFlex Patch Panels

## Category 5e, CAT5E Patch Panels

### Preloaded and Modular

CAT5E Patch Panels are available in REVConnect and KeyConnect styles, as well as HD-BIX and HD-110. Configurations include 24-port 1U, 48-port 2U and 48-port 1U in flat and angled designs. Preloaded panels are available with RJ45 jacks.

#### Benefits

- Performance up to 160 MHz (1200 System)
- Flat and angled options available
- Quick and easy termination with REVConnect termination tool (REVConnect patch panels)
- Front access options (REVConnect patch panels) for additional versatility

#### Features

- REVConnect patch panels feature Belden's revolutionary REVConnect core technology
- REVConnect Patch Panels compatible with color icons and dust covers
- KeyConnect patch panels feature Belden CAT5E KeyConnect connectors with patented leadframe technology
- Single-port modularity on REVConnect and KeyConnect standard densities
- Labeling and cable management accessories included with all patch panels

## Category 5e, Patch Panels and Boxes

### Modular and HD

Flex Patch Panels provide a flexible and versatile termination solution using MDVO modules for telecom room rack-mounted installations.

CAT5E HD Patch Boxes are available in BIX and 110 configurations, and hold one 12-port universal connector module in a compact and robust metal enclosure. The patch box features

a hinged cover and support brackets to secure cables and maintain patch cord bend radius.

Modular Patch Boxes (in KeyConnect and MDVO) can be custom configured in the field using up to 12 Modular Jacks or Multimedia Modules. Modules are ordered separately.

KeyConnect CAT5E Jack and T-Bar

## Category 5e, CAT5E Connectors, Tools and Accessories

REVConnect, KeyConnect and MDVO

CAT5E Connectors are available in two termination styles: Belden's new REVConnect System and standard punchdown in KeyConnect or MDVO styles. REVConnect and KeyConnect have a keystone footprint and are designed to be used with any KeyConnect Patch Panels and with KeyConnect or MediaFlex Workstation Outlets.

### Benefits

- REVConnect: Safe connectivity for air-handling spaces
- REVConnect: Offers great versatility and labor savings
- Provides excellent durability and performance stability

### Features

- REVConnect: Plenum rated - meets UL 2043 requirements
- REVConnect: Requires no pair separation; the best connector for Bonded-Pair and Nonbonded-Pair cable
- REVConnect: Terminates four pairs simultaneously with REVConnect Universal Termination Tool
- KeyConnect/MDVO: Compatible with Belden's Rapid Termination Tool
- Meets and exceeds all Category 5e component performance

## Category 5e, CAT5E EZ-MDVO Modular Jacks

### KeyConnect and MDVO

The EZ-MDVO Module is built with a patented leadframe design and encapsulated insulation displacement contacts, ensuring reliable connections and performance well above Category 5e standards. The unique EZ-MDVO module termination cap allows for a simple and fast "press-fit" installation while ensuring consistent wire termination every time it is snap-locked. The module termination cap is color coded to facilitate wire arrangement and speed up installation time. The termination cap is printed with T568A/B color codes.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. MDVO is designed to be used with Flex Patch Panels, as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT5E Modular Patch Cord

## Category 5e, CAT5E Modular Patch Cords

### Bonded-Pair

CAT5E Modular Patch Cords are made with Belden's patented robust design Bonded-Pair cables. They offer the best combination of transmission performance and physical integrity.

### Features

- Made with small-diameter Bonded-Pair cable for greater flexibility and higher-density installations
- Solid conductors improve attenuation and are needed in long patch cords and pigtails to eliminate the need for cable de-rating in open-office cabling
- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around labels on each cord provide easier product identification and length sorting

## BIX Cross-Connect System

### Components, Patch Cords, Wires and Accessories

The Belden BIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for voice and data networks. This uniquely designed system allows for very high termination density while maintaining ease of administration to accommodate MACs.

Advantages of the Belden BIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows for multiple mounting options of various connectors used in voice and data distribution systems.

## 110 Cross-Connect System

Kits, Components, Patch Cords, Wires and Accessories

The Belden 110 Cross-Connect System uses high reliability Insulation Displacement Connection (IDC) contacts to provide high-performance connections for voice and data networks. This industry-standard 110 system allows for very high termination density

while maintaining ease of administration to accommodate MACs. The system allows for multiple mounting options of 4-pair and 5-pair connecting blocks used in voice and data distribution systems.

## Category 5e, DataTwist 1200 Shielded Cables

### Nonbonded-Pair

Data Twist 1200 Shielded Cable

DataTwist 1200 Shielded Cable consists of 4-pair F/UTP cables that exceed Category 5e ANSI/TIA/EIA-568-C.2 requirements. When used as the horizontal cable in the Belden 1200 Shielded System, the channel provides 160 MHz of bandwidth. DataTwist 1200 F/UTP shielded cable has a thick, 100% coverage foil shield.

This shield protects your system from harsh EMI environments, improving your data throughput.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

## Category 5e, CAT5E Shielded System

### Patch Panels, Jacks and Patch Cords

KeyConnect Shielded Patch Panels provide a flexible, versatile and high-density termination solution for data center and teleco room installations. They come with a ground wire to guarantee shielding integrity (per ANSI/TIA-607-C) and cable management brackets for neat cable dressing. They can be configured using 10GX Shielded Modular Jacks available in REVConnect and KeyConnect styles.

The CAT5E REVConnect module is a rugged, easy-to-install connector. Its termination features a universal core that accepts a jack or plug to support connections in a keystone outlet or direct connections into devices.

CAT5E Shielded Modular Cords are designed to be used within the Belden 1200 Shielded System. These modular cords offer the best combination of transmission performance and shielding integrity.

### Pigtails

CAT5E Shielded Modular Pigtail (connector end)

CAT5E Shielded Modular Pigtails feature solid conductors to improve attenuation and to eliminate the need for cable de-rating in open-office cabling.

#### Benefits

- Maximum RL performance under all patching conditions
- Superior ruggedness and durability

Belden offers a wide variety of workstation outlet systems designed for maximum flexibility, durability, aesthetics and manageability. These systems are available using Belden KeyConnect modularity, MediaFlex flexibility and MDVO options. They come in a wide range of styles, colors and configurations, including single-gang and double-gang faceplates, stainless steel faceplates, adapters and boxes and multimedia outlets and inserts. Several innovative tools and accessories that ease termination and simplify network administration are also available.

**KeyConnect Series** feature a variety of faceplates, adapters and boxes that are compatible with all REVConnect, KeyConnect and Multimedia Modules. Each modular component of the KeyConnect Workstation Outlet System seamlessly fits together to accommodate any surface mount, furniture or standard electrical plate outlet installation.

**MediaFlex Series** includes a full line of modular faceplates, adapter boxes and inserts that offer the ultimate flexibility in configuring multimedia workstation outlets. They feature a front access design that allows inserts to be easily snapped in and out of openings for fast installation and upgrades.

**MDVO Outlet Systems** include a wide range of flush and angled entry faceplates, surface adapter boxes, multimedia outlet boxes, multi-user outlet boxes and modular furniture adapters that accept MDVO modules to support diverse configurations of voice, data and multimedia applications.

**The LabelFlex Solution** simplifies network management by enabling installers to quickly produce application-specific labels for most Belden products, including Modular Jack Connectors, Cross-Connect Systems, Patch Panels, KeyConnect series, MediaFlex series and cable applications.

AX104687, KeyConnect Tamper-Resistant Faceplate  
AX104688, KeyConnect Tamper-Resistant Faceplate

Compatible with all REVConnect and Multimedia Modules, KeyConnect Faceplates are designed for maximum flexibility, durability, aesthetics and manageability. They are available in a variety of styles, colors and port configurations to meet all work area outlet application needs, and they provide for easy outlet identification.

Belden offers two Tamper-Resistant Faceplates for various applications:

**The KeyConnect Water-Resistant Outlet** features a wall-mounting gasket and patch cord entry seal, and is designed for the healthcare environment.

**The KeyConnect Secure Outlet** is designed for any application where access to network connections needs to be controlled.

### Features and Benefits

- KeyConnect Faceplates are compatible with all KeyConnect and REVConnect jacks and multimedia modules
  - Fire-retardant plastic with UV stabilizer for protection against color degradation
  - Top and bottom labeling windows for easy outlet identification
  - Compatible with LabelFlex labeling solution
- KeyConnect Faceplates are available with mounting studs for wall-mount phone installation
  - Available in stainless steel and white plastic
- Tamper-Resistant Faceplates prevent casual access
- Water-Resistant Outlets resist fluids, cleaning products and dust for maximum uptime

## Workstation Outlets (continued)

### KeyConnect Adapters, Boxes and Media Boxes

KeyConnect Adapters and Boxes in various styles, sizes and colors provide flexible surface mount, modular furniture and standard electrical plate outlet installation, including high-density workstation outlets. Some models comply to UL2043 for use in plenum space.

#### Features and Benefits

- KeyConnect Adapters available in Deco and 106 styles for use with standard electrical plates
- KeyConnect Modular Furniture Adapters available in 3- and 4-port configurations for high-density workstation outlets in office furniture. Opening complies with ANSI/TIA-569-D standard.
- KeyConnect Adapters available in almond, electrical white and black to match electrical plates and suit any office décor
- KeyConnect Boxes are available in 1- 2- 4- and 6-port configurations for design flexibility
- KeyConnect Boxes equipped with port shutters to provide dust protection to UTP jacks
- Fire-retardant plastic with UV stabilizer for protection against color degradation
- KeyConnect Adapters are compatible with all KeyConnect UTP and Multimedia Modules

## Workstation Outlets (continued)

### MediaFlex Faceplate Kits, Plates, Adapter Boxes

MediaFlex Faceplate Kit for KeyConnect modules offers flexibility in configuring multimedia workstation outlets for current and future network needs. The front access design of the outlets offers easy installation and upgrades while multiple colors, single-gang and double-gang configurations and labeling capabilities meet work area aesthetics, density and identification needs.

The MDVO pre-configured MediaFlex Faceplate Kits include a plate, flush MDVO inserts, filler inserts, MDVO blanks, labeling window covers, labeling paper and all necessary mounting screws.

MediaFlex Plates are one part of the comprehensive line of plates and inserts that snap together to create a full line of modular workstation outlets.

MediaFlex Plates can be mounted over standard NEMA-type outlet boxes and rings to provide support for a variety of MediaFlex Adapters and

Inserts. The fully modular construction, combined with the front access design, provides extensive configuration flexibility for current and future network needs. MediaFlex Plates are available in single-gang and double-gang configurations.

The double-gang faceplate comes with a stand-off ring. This ring allows for easy mounting with virtually any industry electrical box or mud/adaptor ring, providing added installation flexibility.

Each plate has the capacity of up to six ports per single-gang and 12 ports per double-gang.

MediaFlex Surface Adapter Boxes can be mounted over standard NEMA-type outlet boxes and rings to provide support for the MediaFlex plates. The MediaFlex Surface Adapter Boxes are available as a double-gang configuration. The double-gang box allows more room for cable management and bend radius control.

### MediaFlex Angled Edge Faceplate Kits, Faceplates, Adapter Boxes

AX106631, MediaFlex Angled Edge Faceplate Kit, KeyConnect Style, 2-port Angled Insert

The MediaFlex Faceplate Kits are offered for KeyConnect or MDVO modules. Our newest line of MediaFlex features a 90-degree edge to match aesthetics when installing next to electrical and other faceplates.

The MediaFlex Faceplate Kit for KeyConnect modules offers flexibility in configuring multimedia workstation outlets for current and future network needs. The front access design of the outlets offers easy installation and

upgrades while multiple colors, single-gang and double-gang configurations and labeling capabilities meet work area aesthetics, density and identification needs.

The MDVO pre-configured MediaFlex Faceplate Kits include a plate, flush MDVO inserts, filler inserts, MDVO blank, labeling window covers, labeling paper and all necessary mounting screws.

## Workstation Outlets (continued)

### MediaFlex Inserts, Multimedia Inserts

MediaFlex Module Inserts, along with MediaFlex Multimedia Inserts and MediaFlex Filler Inserts, allow for the easy configuration of outlets. All inserts are front loaded and easily snapped in and out of the MediaFlex Plates for simple installation and maintenance. MediaFlex Module Inserts are available in a 2-port configuration in flush and angled versions for KeyConnect and MDVO modules. The inserts are two units high for the flush version and three units high for the angled version. Three flush inserts or two angled inserts are required to fully populate a single-gang MediaFlex Plate.

MediaFlex Filler Inserts are used to fill unused spaces in low-density workstation outlets. They are available in one unit and two unit sizes.

MediaFlex Multimedia Inserts provide optimum flexibility in configuring multimedia workstation outlets that respond to any present or future network needs. MediaFlex Multimedia Inserts, along with other MediaFlex Inserts, allow for easy configuration of outlets. All inserts are front loaded and easily snapped in and out of the MediaFlex Plates for easy installation and maintenance.

MediaFlex Multimedia Inserts are available in angled versions only to allow for proper management of cable bend radius. The inserts are three units high; two inserts are required to fully populate a single-gang faceplate and four inserts will fully populate a double-gang faceplate.

A0645267, MDVO Angled Entry Faceplate

Interface Plates combine flexibility and ease of use in workarea installations. They are designed to accept the EZ-MDVO and other MDVO, UTP and MDVO multimedia modules. The Interface Plates are available in single-gang and can accept up to six modules. They also have labeling capabilities using built-in labeling windows. The faceplates can be attached to standard electrical boxes or wall-mounting hardware for flush-mount installations. The faceplates can also fit over the Interface Adapter Boxes for surface-mount installations.

The MDVO Angled Entry Faceplate offers better patch cord protection than traditional faceplates and optimizes patch cord bend radius control. The MDVO Angled Entry Faceplate can accept up to four EZ-MDVO or MDVO Multimedia Modules. The faceplate can be attached to standard electrical boxes or wall-mounting hardware for flush-mount installations. The faceplate can also fit over the Interface Surface Adapter Box for surface-mount installations.

## Workstation Outlets (continued)

### Interface Surface Adapter Boxes, MDVO Adapters

The Interface/MDVO Surface Adapter Box allows surface mounting of Interface Plates as well as MDVO flush and angled entry faceplates. The box can be mounted on any flat surface or attached to standard electrical boxes or wall-mounting hardware for additional storage space ordered separately.

The MDVO 106 Adapters are designed for installations using standard NEMA-style

faceplates, also referred to as 106-type or duplex wall plates.

The MDVO Deco Adapter is designed for installations using Deco style wall plates.

MDVO Modular Furniture Adapters are the ideal outlet adapters for open-office furniture applications.

A0407001, MDVO Coaxial, VIDEO F

The Multimedia Outlet Box brings unique versatility to multimedia work area installations. The box design provides cable management and helps maintain cable bend radius. The outlet box's low-profile design and side entry offers better protection for patch cords. The outlet box can accept up to six Modular Jacks or Multimedia Modules using 2-port inserts and three SC Duplex adapters using special bezel, or three SC Duplex adapters. The Multimedia Outlet Box can be mounted directly on the wall or attached to standard electrical boxes. Included with the

Multimedia box are three SC Duplex Mounting bezels and three Modular Jack Adapters.

Multimedia Modules address audio video and fiber applications. Fiber modules are available for LC Duplex, SC Simplex, SC Duplex and ST Compatible for multimode and singlemode connections. The SC Duplex Adapter is a fiber adapter sleeve with flanges that mount into the SC Duplex mounting bezel (included in the Multimedia Outlet box). Audio video modules are available for SVHS, RCA, BNC and Video F connection in KeyConnect and MDVO footprint.

### Multi-User Outlet Box, Adapter Strips, CAT5E BIX DVO Outlets

The Multi-User Outlet Box design allows for mixed-media installations with a choice of connection strips. The box can accept either one or two 12-port MDVO Adapter Strips, CAT5E Connector Module Strips (BIX or 110), or a combination of both for a maximum of 24 connections.

CAT5E BIX DVO Workstation Outlets are robust and installer-friendly products, combining

punchdown connectors with standard modular jacks. The outlet's unique, completely enclosed housing protects the connectors and allows the wires to be front-terminated on BIX Insulation Displacement Connectors (IDC). The snap-on cover plate allows easy access and eliminates visible mounting screws.

CAT5E BIX DVO Workstation Outlets offer headroom over the Category 5e cabling standard.

### MDVO and KeyConnect Accessories

A0405538, MDVO Blank

AX100196, ID Tab Data

AX102022, Colored Bezel

AX101790, Dust Cover, AX102263, KeyConnect Blank Insert

MDVO Blank Inserts can be used in any MediaFlex outlets, Interface plates, MDVO faceplates, adapters or boxes to fill in unused ports.

The Colored Bezels are plastic inserts that fit over the face of MDVO modules to modify their color. They are particularly useful in installations where the churn rate is high and color identification of outlets is critical (segmented network with security levels, for example). They also contribute to simplifying the management of the cabling infrastructure by using only one color of module for MACs.

ID tabs are color-coded identification caps that can be inserted over the MDVO modules. The ID tabs are available as blank, data or voice coded. They are available in 11 colors to facilitate identification and match modern office décor. The flexible identification cap also acts as a protective cover, eliminating exposure to dust and other contaminants when the module is not in use.

KeyConnect accessories include blank inserts available in almond, white and black, as well as Dust Covers in clear plastic to protect unused ports.

### REVConnect and KeyConnect Tools and Accessories

The REVConnect Connectivity System is supported by a single, universal core termination. The core supports the user's choice of connectivity: Category 5e through Category 6A, shielded and unshielded, and even Category 6A Field-Mountable Plugs. The REVConnect Termination Tool is the only tool required to perform the termination, including cable preparation.

- Go-no-go functionality only allows a termination when the core is properly seated inside the tool
- Includes a cable stripper and crossweb guillotine tool in the handle
- Additional blade set included with each tool
- Replacement blades and cable preparation tools available
- Tool belt clip available for hands-free carrying
- Terminates REVConnect core for all Belden cables and all REVConnect modules

#### Key Specifications

- Rugged design withstands tens of thousands of terminations
- Rubber handle grips for comfort

### Tools

AX100749, 110 Connecting Tool

The 110 Connecting Tool is a no-impact connecting tool used to terminate cables, pigtails or cross-connect wires on any KeyConnect module or 110 product. The 110 Tool is a spring-activated hand tool. A single forward movement will seat the wire into the IDC clip and cut off the excess wire. The tool will terminate 22, 24 and 26 AWG plastic insulated solid copper conductors.

Modules or MediaFlex Inserts during pair placement and wire termination. Cable retainers on each end of the station will secure and hold cables during the pair placement process. The flat bottom surface provides the required stability to safely terminate modules. The tool is made of very durable plastic; its low profile makes it an easy tool to use and carry.

1797B 009, Cable Preparation Tool

The Bonded-Pair Cable Preparation Tool makes it faster and easier to prepare cables for connector termination. This tool is ideal for use with Belden Bonded-Pair Cables, providing special features that help separate twisted pairs. It can also be used to prepare any Nonbonded-pair cable for installation.

The Outlet Release Tool is a convenient tool for servicing MediaFlex and Interface outlets. Its bent tip allows for easy front removal of MediaFlex inserts, especially when used in Angled Entry plates. It is also very useful for extracting KeyConnect Modules from miscellaneous mounting hardware.

The Termination Station is an ergonomically designed holder that provides stability to the KeyConnect Module during termination. The station has pockets with locking features that steadily hold either MDVO or KeyConnect

The Patch Cord Tool allows to connect and disconnect RJ45 patch cords installed in very high-density environments (48-port, 1U patch panels and high-density networking equipment).

## Labels

### LabelFlex

The LabelFlex solution is aimed at simplifying network management. Using the labeling system (software and label types), you can rapidly produce quality, application-specific labels for most Belden products in a fraction of the time needed for traditional methods.

Category 3, Horizontal and Backbone Indoor Cables	73
Category 6 and 5e, Patch Cables	74
Category 5e, Backbone Indoor Cables	75

Belden understands that not every application is the same and unique situations and environments may call for a different cable solution. That's why our Copper Solutions Catalog also includes a variety of additional Belden quality cables to meet specific customer needs. From shielded, bundled Siamese and limited combustible cables, to outside plant, multi-pair and patch cables, Belden has the copper cable you need for a variety of voice, data and control applications.

**DataTwist Category 6, 5e and 5 Cables** are available in shielded (F/UTP) plenum and non-plenum varieties with several color and packaging options to ease installation, handling and identification.

**DataTwist 1200 Bonded-Pair UTP Siamese Cables** come bundled with two 4-pair cables for easy break-out and identification.

**Limited Combustible Cable** is a plenum cable that provides the ultimate in fire and smoke safety. These cables are specifically engineered to meet NFPA requirements for a Limited Combustible cable while offering beyond-standards performance for Category 6 and 5e.

**DataTwist Outside Plant (OSP) Cables** are available in Category 6 and Category 5e cables and feature a thick polyethylene jacket for better moisture and cut-through resistance.

**Backbone Indoor Cables** are available in Plus 25-pair Category 5e backbone cables for highspeed applications or in DataTwist Category 3 UTP multi-pair cables, including up to 300-pair count cables for large voice communication systems.

Better.

## Category 6, 5e, and 5, DataTwist Shielded Cables

### Nonbonded-Pair

DataTwist 6, 5e and 5 F/UTP Shielded Cables have thick, 100% coverage foil shields that protect systems from harsh EMI environments, which improves data throughput.

DataTwist 6 and 5e Shielded Cables consist of 4-pair F/UTP cables that meet or exceed

ANSI/TIA-568-C.2 requirements. DataTwist 5 meets or exceeds ANSI/TIA-568-B.2 requirements.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

DataTwist 5e Cable

## Category 5e, DataTwist 5e Cables

### Nonbonded-Pair

DataTwist® 5e Cables are easy to install and offer all the performance you need to meet ANSI/TIA-568-C.2 Category 5e standards. DataTwist 5e Cables are available in plenum and non-plenum versions, and several color and packaging options to make installation, handling and identification easier. Made to the highest-

quality standards in the industry, DataTwist 5e Cables support all applications that operate using Category 5e standards.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

## Category 5e, DataTwist 1200 Siamese Cables

### Bonded-Pair

DataTwist 1200 Bonded-Pair provides superior electrical performance “on-the-reel” and in the wall. DataTwist 1200 Bonded-Pair Cables are available in plenum and non-plenum versions. They ensure superior Installable Performance® by utilizing the patented Bonded-Pair design. They exceed the full range of industry

performance criteria, both electrically and physically. DataTwist 1200 Bonded-Pair Enhanced Category 5e Cable sets a new precedent for cabling with confidence.

Information about products contributing to LEED points is available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)

## Category 6, 5e, Limited Combustible Cables

### Nonbonded-Pair and Bonded-Pair

DataTwist Limited Combustible Cable is a revolutionary UTP cable engineered specifically to meet the NFPA requirements for a Limited Combustible cable and perform beyond requirements per ANSI/TIA/EIA-568-C.2. Available only in a plenum version, the

DataTwist Limited Combustible Cable is the next generation of cable technology - providing the ultimate in fire and smoke safety.

**These Limited Combustible cables meet the requirements for the Living Building Challenge.**

Outside Plant, Gel-filled

## Category 6A, 6, 5e, Indoor/Outdoor (I/O) and Outdoor Cables Nonbonded-Pair, Bonded-Pair

Category 6A, 6 and 5e Outside Plant (OSP) Cables are 100% gel-filled with a non-sticky PP compound that is easy to remove when terminating. Each product also has a thick polyethylene or PVC jacket for better moisture and cut-through resistance. All products on this

page meet or exceed ANSI/TIA-568-C.2 and ANSI/ICEA S-56-434 requirements. The OSP versions comply with ANSI/ICEA S-99-689 and ANSI/ICEA S-107-704 Water Penetration Test, and the CMR/CMX versions comply with ANSI/ICEA S-100-685.

## Category 3, Horizontal and Backbone Indoor Cables

### DataTwist 3, D-Inside Wire and ATMM/ARMM

DataTwist 3 Cable is a high-value UTP cable engineered specifically to perform to Category 3 requirements per ANSI/TIA-568-C.2. DataTwist 3, D-Inside Wire, D-Flex Plenum and the ATMM Cable

Series are rugged multi-pair cable series that meet and exceed ANSI/TIA-568-C.2 and CSA T529-95 specifications, and are perfect for use in networking and communication systems.

DataTwist Patch Cable

## Category 6 and 5e, Patch Cables

### Nonbonded-Pair and Bonded-Pair

DataTwist Patch cables are flexible 4-pair products designed to be used in the work area, between patch panels or as equipment cords. Whether Category 6 or 5e, these products exceed Category 6 or Category 5e requirements as per ANSI/TIA-568-C.2.

Our high-end products, 1752A and 1875GB, are the premier patch cable products in the industry. Bonded-Pair technology gives these flexible cables rock-solid RL performance when flexed or

moved. Bonded-Pairs also improve the cable's balance, which reduces the effects of noisy environments. These products also incorporate fused stranded conductors. Fusing the strands helps ensure that ambient moisture/humidity will not affect insertion loss.

Information about products contributing to LEED points are available at [info.belden.com/leed-credits](http://info.belden.com/leed-credits)
